Plant and Soil **161**: 305–308, 1994.

Contents Volume 161 (1994)

Selected papers from the **PROCEEDINGS OF THE 14TH NORTH AMERICAN CONFERENCE ON SYMBIOTIC NITROGEN FIXATION**

Evolution and diversity in the legume-rhizobium symbiosis: Chaos theory? 1
J.I. Sprent

Recent developments in *Rhizobium* taxonomy 11
E. Martínez-Romero

Host range, RFLP, and antigenic relationships between *Rhizobium fredii* strains and *Rhizobium* sp. NGR234 21
H.B. Krishnan, S.G. Pueppke

Rapid identification of *Rhizobium* species based on cellular fatty acid analysis 31
B.D.W. Jarvis, S.W. Tighe

Ammonium sensing in nitrogen fixing bacteria: Functions of the *glnB* and *glnD* gene products 43
C. Kennedy, N. Doetsch, D. Meletzus, E. Patriarca, M. Amar, M. Iaccarino

Regulation of nodulin gene expression 59
F.J. de Bruijn, R. Chen, S.Y. Fujimoto, A. Pinaev, D. Silver, K. Szczyglowski

Synthesis, release, and transmission of alfalfa signals to rhizobial symbionts 69
D.A. Phillips, F.D. Dakora, E. Sande, C.M. Joseph, J. Zoń

Role of rhizobial lipo-oligosacharides in root nodule formation on leguminous plants 81
O. Geiger, T. Ritsema, A.A.N. van Brussel, T. Tak, A.H.M. Wijfjes, G.V. Bloemberg, H.P. Spaink, B.J.J. Lugtenberg

Sucrose transport and hydrolysis in *Rhizobium tropici* 91
V.I. Romanov, E. Martínez-Romero

Shoot/root assimilate allocation and nodulation of *Vigna unguiculata* seedlings as influenced by shoot light environment 97
M.J. Kasperbauer, P.G. Hunt

Mechanism of osmotically regulated N-acetylglutaminylglutamine amide production in *Rhizobium meliloti* 103
L. Tombras Smith, A. Ameer Allaith, G.M. Smith

What triggers the regulation of nitrogenase activity in forage legume nodules after defoliation? 109
U.A. Hartwig, J. Nösberger

Nodulation and nitrogen fixation in extreme environments 115
L.M. Bordeleau, D. Prévost

Analysis and regulation of legume inoculants in Canada: The need for an increase in standards 127
P.E. Olsen, W.A. Rice, L.M. Bordeleau, V.O. Biederbeck

Recent developments in the actinorhizal symbioses 135
A.M. Berry

Research articles

***Rhizobium tropici* nodulates field-grown *Phaseolus vulgaris* in France** 147
N. Amarger, M. Bours, F. Revoy, M.R. Allard, G. Laguerre

Interacting effects of pH, aluminium and base cations on growth and mineral composition of the woodland grasses *Bromus benekenii* and *Hordelymus europaeus* 157
J. Brunet

Agronomic assessment and ^{15}N recovery of urea amended with the urease inhibitor nBTPT (N-(n-butyl) thiophosphoric triamide) for temperate grassland 167
C.J. Watson, P. Poland, H. Miller, M.B.D. Allen, M.K. Garrett, C.B. Christianson

Cotton root and shoot response to localized supply of nitrate, phosphate and potassium: Split-pot studies with nutrient solution and vermiculitic soil 179
S.M. Brouder, K.G. Cassman

Seasonal variation in methane flux from rice paddies associated with methane concentration in soil water, rice biomass and temperature, and its modelling 195
I. Nouchi, T. Hosono, K. Aoki, K. Minami

Nitrogen mineralization and H^+ transfers in a Scots pine (*Pinus sylvestris* L.) forest soil as affected by liming 209
G. Arnold, M.L. van Beusichem, A. van Diest

A new approach for rhizosphere research by X-ray microanalysis of micro-liter soil solutions 219
E. Fritz, D. Knoche, D. Meyer

Soil core and minirhizotron comparison for the determination of root length density 225
B.K. Samson, T.R. Sinclair

Carbon translocation to the rhizosphere of maize and wheat and influence on the turnover of native soil organic matter at different soil nitrogen levels 233
E. Liljeroth, P. Kuikman, J.A. van Veen

Nitrogen effects on rhizosphere processes of range grasses from different successional seres 241
B.A. Frederick, D.A. Klein

Ionic relations of aeroponically-grown olive genotypes, during salt stress 251
M. Tattini

The effect of glutamine and asparagine on net NH_4^+ uptake in young wheat plants 257
H.F. Causin, A.J. Barneix

Biological nitrogen fixation in four *Gliricidia sepium* genotypes 267
M. de S. Liyanage, S.K.A. Danso, H.P.S. Jayasundara

The Wageningen Rhizolab – a facility to study soil-root-shoot-atmosphere interactions in crops. I. Description of main functions 275
S.C. van de Geijn, J. Vos, J. Groenwold, J. Goudriaan, P.A. Leffelaar

The Wageningen Rhizolab – a facility to study soil-root-shoot-atmosphere interactions in crops. II. Methods of root observations 289
A.L. Smit, J. Groenwold, J. Vos

Short communication

Root length and biomass losses during sample preparation with different screen mesh sizes 299
M. Amato, A. Pardo
